I had the pleasure to work with Eugene Efremov during a big technical project.

Eugene impressed me as someone who was proactive and passionate about nuances of the thematic range. Eugene has demonstrated his professional approach including the ability to effectively use of CAT systems (SDL Trados) while he was engaged in translation of technical documentations related to a big international managed building project. I was very impressed on the accuracy of his work. Eugene is a qualified linguist, his translation skills allowed us to meet all expectations of the customer.

I have no hesitations in recommending Eugene for any endeavor he attempts in the future.

Sincerely,
Andreas Giebelhaus
